Declaration of conformance

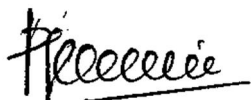

Oekotex Standard 100 Jakazol and Jakofix dyes

We confirm that none of the restricted substances listed in Oeko-tex Standard 100 (Appendix 4 and Appendix 6) are intentionally being used in the manufacturing of below listed Jakazol and Jakofix brand of reactive dyes. However, if applied according to our recommendations, these products will not cause textile articles to exceed limiting values mentioned in Oekotex 100 Edition/Ausgabe 1/2018 dated 02/01/2018 standard specification

The amounts of the metal impurities contained in these dyes are below the internationally recognized “ETAD recommended limits for the metal impurities in dyestuffs”.

The fastness properties of individual dyes are given in the technical data sheets. The fastness properties of the textile article and the waste water characteristics are depending on the factors other than the dyes, are not covered in this declaration. This declaration does not absolve the user from making their own tests and controls to ensure that the finished textile article conforms to the requirements of Oeko- Tex standard 100

For Jay Chemical Industries Ltd

P.S. Kulkarni

General Manager (Product Development)

- 1 May contribute to Ammonical Nitrogen in the waste water
- 3 Metal complex dye
- 4 usage restricted to <2% shade
- 5 <10 ppm P- Chloro aniline
- 6 <100 ppm P- Chloro aniline
- 7 <40 PPM p-Chloro aniline
- 8 <150 ppm P- Chloro aniline
- 9 <150 ppm of 2- Naphthylamine
- 10 <50 ppm P- Chloro aniline
- 11 <50 ppm P- Chloro aniline + 1.00% Copper
- 12 <50 ppm P- Chloro aniline + <100 PPM 2- Naphthylamine
- A Suitable
- B Test for heavy metal content on textile article before bulk application
